Sweet Pea Machine Embroidery Designs Design Files Disclaimer-
Please note to customers who use embroidery software to open our files. In doing so, you may run the risk of the design not stitching as intended by our digitiser's instructions.

We highly recommend that any design file purchased from us should be downloaded as per our "how to download our designs" instructions on our website and placed directly onto a USB/memory card and then placed directly onto the embroidery machine.

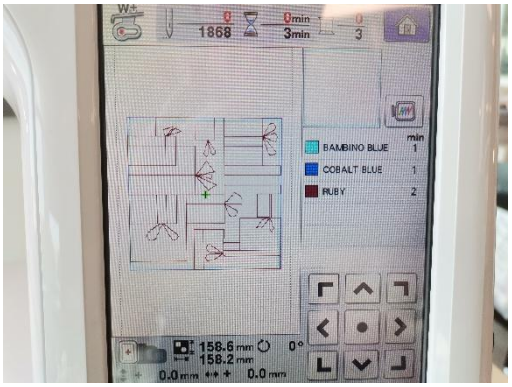

We will not be obligated to provide compensation to customers who have put our files through their software and the resulting stitch out was not as intended.

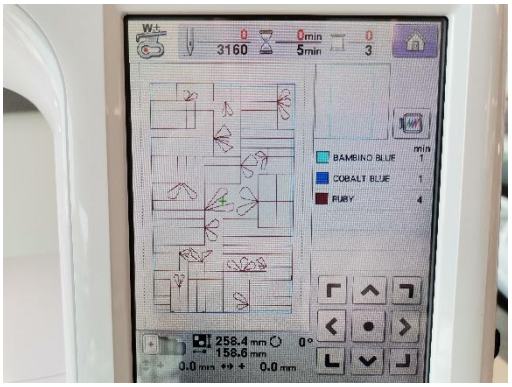

INSTRUCTIONS - USING YOUR EMBROIDERY MACHINE:
For tips on how to correctly hoop your stabiliser, go to https://swpea.com/blogs/machine-embroidery-blogs/tips-for-stabiliser-in-the-hoop

HOW TO DO THE QUILTING
Hoop stabiliser, or if you prefer, hoop the item you are embroidering on (i.e. quilt, runner, shirt, etc.) or a medium cutaway. For items of clothing, we float the garment without hooping.

Load the design onto your machine.

Square **Rectangle**

OPTIONAL: STEP 1 Place **Batting 1** on top of the hoop. Stitch the batting down. Remove the hoop from your machine and trim the batting about 1-2mm from the stitching **– skip this step if you are not creating an individual block to add to a project.**

STEP 2 Stitch down your project or **Fabric A** with the basting stitch (this is optional and will need to be unpicked later but it gives stability to your embroidery while stitching it).

STEP 3 Stitch the quilting. (if you would like the quilting to stand out more, repeat this step)

Once you have completed the embroidery, remove from the hoop. Trim away any excess stabiliser if you used it.

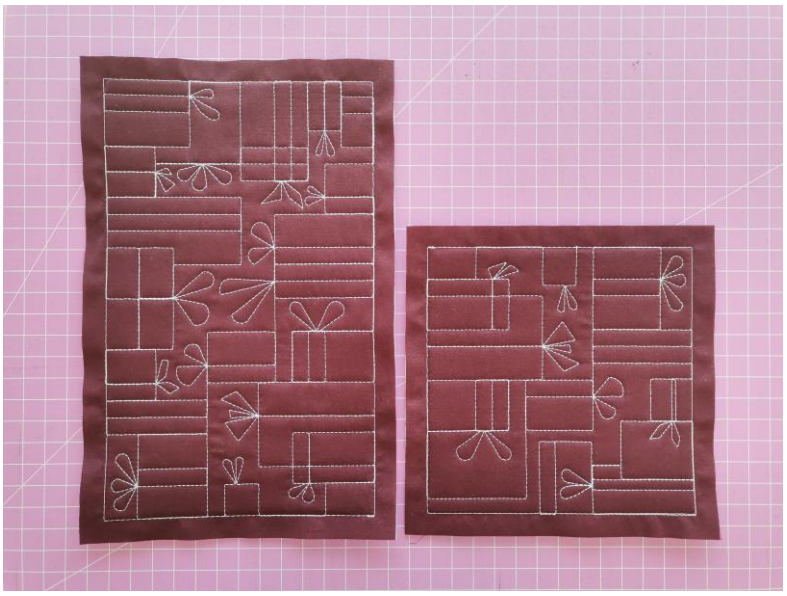

Unpick the basting stitch if you decided to use it during STEP 2.
